DETAILED ACTION

The amendment and remarks filed 07/06/05 have been acknowledged and entered.

The rejection under 35 U.S.C. 112, second paragraph stated in paper No. 040405 has been withdrawn in view of applicant's amendment.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or

provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-8, and 10-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 34-35, and 37 of copending Application No. 10/760,596.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods as claimed in both applications are functionally equivalent.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

This rejection stated in paper No. 040405 is maintained.

Claim Rejections - 35 USC § 103

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 354069260A.

JP'260 a method of cleaning a flat substrate comprising supporting the substrate, transmitting sonic energy to the substrate while flowing liquid onto both sides of the substrate to loosen the particles as claimed. See the abstract, and Figs. 1-2. JP'260 does not teach horizontal orientation.

It would have been obvious for one skilled in the art to use JP'260 to obtain the claimed process. This is because the substrate taught by

JP'260, at some point during rotation, will be in generally horizontal orientation. Also the transmitter at some point during rotating the substrate will be adjacent to one side which could be the upper side. Also regarding the vibration, one skilled in the art would adjust the frequency to obtain optimum results.

Response to Arguments

Applicant's argument with respect to JP'260 does not teach the horizontal orientation, is unpersuasive, because JP'260 substrate at some point during rotating, will be at generally horizontal orientation as claimed. Also the recitation of "maintaining said orientation" is not clear if it refers to the horizontal orientation.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing

date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
